FINTECH OPERATIONS & TECHNICAL CUSTOMER SUCCESS SPECIALIST

7+ Years Experience | Payment Gateway Operations | API/XML Troubleshooting | Cross-Border Reconciliation

🔗 PROFESSIONAL SUMMARY

Customer-centric and technically skilled Operations Specialist with 7+ years of expertise in digital payment gateways, telecom platforms, eWallets, and cross-border financial transactions. Proven track record in L2 technical support, API/XML log analysis, transaction reconciliation, and structured reporting. Skilled at bridging the gap between clients, dealer networks, and software engineering teams. Seeking to leverage deep domain expertise in operations, client service, and technical troubleshooting in a global organization environment offering visa sponsorship.

🔗 CORE COMPETENCIES & TECHNICAL SKILLS

- Payment Operations: Transaction Monitoring, End-to-End Financial Reconciliation, eWallet & Dealer Operations, Chargebacks, Reversals & Adjustments, Settlement Validation.
- Technical & L2 Support: API & XML Log Inspection, HTTP Error Analysis (Timeouts, Connection Pools), JSON Deserialization Debugging, Root-Cause Analysis, Integration Support.
- Tools & Automation: Excel (Data Validation, VLOOKUP, Pivot Tables), Google Workspace Automation, SQL (Basic Querying), Postman (API testing), Jira, Zendesk, Ticketing Systems.
- Partner & Client Success: Vendor/Provider Management, SLA Governance (95%+ Resolution), Incident Communication, Onboarding & Training Documentation, Cross-Border Dealer Relations.
- Domains: B2B Digital Payments, Telecom & Utility Billing, Cross-Border Transaction (India, Qatar, Malaysia, Europe), SaaS & Merchant Operations.

🔗 PROFESSIONAL EXPERIENCE

PayPoint Nepal Pvt. Ltd. | Kathmandu, Nepal

Customer Service Specialist | April 2019 – Present

Key Overview: Spearhead daily payment operations, cross-border transaction monitoring, service provider integrations, and L2 technical incident resolution for Nepal's leading digital payment network connecting 500+ active dealers and multi-country eWallet partners.

Financial Reconciliation & Payment Operations

- Monitored and reconciled daily multi-million rupee transaction flows across telecom, IPTV, utility, and eWallet platforms with 99%+ accuracy in financial ledger verification.
- Performed daily and monthly balance reconciliations with provider dashboards, resolving "No Status" and stuck transactions to eliminate balance discrepancies.
- Managed dealer wallet operations, overseeing credit limit adjustments, daily top-ups, and balance risk controls to ensure uninterrupted agent operations.
- Processed complex transaction reversals and adjustment requests for erroneous payments while maintaining audit-compliant documentation.

L2 Technical Support & API Issue Resolution

- Analyzed API/XML log files (connection pool failures, JSON deserialization errors, HTTP timeout codes) to isolate root causes of payment failures and coordinate fixes with engineering teams.
- Identified a critical system logic error blocking non-IPTV user payment flows; designed conditional validation logic that reduced system drop-offs and error rates by 20%.
- Monitored real-time service provider outages and executed failover protocols (Lock/Offline modes) to prevent system inconsistencies and transaction failures during downtime.
- Partnered with provider and technical integration teams to document API spec requirements (specimen PDFs, product codes) and train onboarding merchants.

Process Automation & Operational Efficiency

- Maintained consistent manual reporting of daily transaction flows, guaranteeing accurate reconciliation updates despite high-volume workloads.
- Authored and maintained the internal "Customer Service & Escalation Guide," standardizing onboarding for new support personnel and reducing ramp-up time by 40%.
- Centralized provider contact directories and escalation checklists, reducing mean-time-to-resolution (MTTR) for high-priority incidents by 65% through proactive API validation and provider dashboard checks.

Cross-Border Operations & SLA Excellence

- Resolved 95%+ of complex customer and dealer inquiries within SLA targets, maintaining high retention rates across high-volume dealer accounts.
- Managed cross-border payment tracking and balance verification across international partner networks in India, Qatar, Bangladesh, Malaysia, and Europe.
- Supported 24/7 high-availability operations by providing holiday and off-hours emergency response for critical gateway incidents.

Shoes Bank/ Goggles | Kathmandu, Nepal

Retail Sales Worker | *Apr 2017 – Nov 2018*

- Managed inventory tracking, cash reconciliation, and front-line customer service, achieving top monthly sales performance.

◆ EDUCATION AND CERTIFICATIONS

- **Certification in Java Programming & Software Concepts** | Broadway Infosys
- **High School Diploma (+2 Level, Management)** | Milestone International College, 2017
- **Secondary School Leaving Certificate (SLC)** | AIMS International Academy
