Operations & Customer Success Specialist | 7+ Years in Digital Payments & Telecom

◆ Summary

I am a proactive, customer support and operations-oriented professional who is committed to delivering high-quality service to the clients. With 7 years of experience in digital payment systems, telecom services, and utility platforms, I have a strong background in online payments. Skilled in transaction monitoring, reconciliation, API-level issue analysis, and provider coordination I have developed extensive experience in supporting customers with online payment transactions, both nationally and internationally. With a proven track record of handling customer inquiries and providing timely, effective solutions to their problems, I also have experience in generating mail reports and system reports related to online payment processing.

◆ Core Skills

- Transaction Monitoring & Reconciliation
- Customer Success & Complaint Resolution
- API & XML Issue Analysis
- Payment Gateway Operations
- Provider & Vendor Coordination
- Process Improvement & Risk Mitigation
- Reporting & Data Analysis (Excel, Google Sheets)
- Cross-Border Payment Operations

◆ Professional Experience

PayPoint Nepal Pvt. Ltd. | Customer Service Specialist

April 2019 – Present

- Managed **end-to-end reconciliation** across telecom, internet, IPTV, utility, and eWallet platforms, ensuring 99% accuracy in financial records.
- Monitored and reconciled **pending transactions**, verifying success/failure status with providers and performing manual adjustments (refunds or success updates) to maintain financial accuracy.
- Performed **daily and monthly reconciliation** of transaction data with service providers, identifying discrepancies and checking provider daily deposit dashboards with internal records to resolve “No Status” transactions.
- Automated daily reporting, saving **3+ hours per day** and improving visibility for agents and internal teams.
- Managed **dealer wallet operations** by monitoring balances, coordinating top-ups with accounts, adjusting credit limits, and assisting dealers with login resets and billing limits.
- Resolved **95% of customer complaints within SLA**, boosting satisfaction scores and dealer retention.

- Coordinated directly with providers during outages, minimizing downtime and restoring services faster.
- Analyzed API/XML logs (technical failure e.g., timeout errors, connection pool failures), to identify root causes of failures, leading to system improvements and reduced error rates.
- Monitored **service provider changes** (data/voice packages, pricing updates) and communicated updates internally and to clients.
- Managed **service modes (Offline, Lock)** during provider downtime to control transaction flow and prevent system inconsistencies.
- Prepared quick-reference Excel file and updated integration documents (specimen PDFs) with new Data/Voice product codes to help prevent client payment failures, and shared finalized documents via email and messaging platforms (WhatsApp/Teams) under CEO authorization.
- Maintained structured records using **Google Sheets** for transaction tracking, user complaints, reconciliation, and reporting.
- Supported internal teams and dealers by retrieving historical transaction data for the current fiscal year and preparing customized reports when required.
- Processed **reversal and adjustment requests** for incorrect payments (e.g., wrong number recharge, incorrect internet/TV payments).
- Maintained a centralized **provider contact directory and support checklist** for efficient issue escalation.
- Verified and updated **Users' Utility details**, coordinating with providers to ensure accurate data availability.
- Conducted **dealer engagement activities**, including identifying inactive dealers and following up to improve service usage.
- Managed voucher-based recharge system (dealer and system side), assisted users with recharge issues, and coordinated with providers to validate codes or issue replacements.
- Maintained a Customer Service Guide for onboarding new staff, detailing workflows from query handling to escalation
- Provided support during off-hours and holidays, ensuring continuous service availability and issue resolution.
- Resolved complex transaction issues by analyzing **API/XML** data and provider logs, coordinating with developers and Service providers.
- Identified and fixed a critical system logic issue where users without IPTV were blocked from payment flow, and proposed conditional validation improvements to enhance current system flexibility.
- Escalated unresolved API issues (e.g., JSON deserialization errors, duplicate payment attempts) to developers and coordinated fixes with technical teams.
- Documented and communicated remaining API implementation requirements for service integration, ensuring alignment with internal and external stakeholders.
- Provided structured guidance on transaction verification processes, ensuring teams could manually validate and reconcile payments when required.
- Supported cross-border transaction monitoring and reconciliation, strengthening PayPoint Nepal's global presence through partnerships with international networks and dealers in countries including India, Qatar, Bangladesh, Malaysia, and Europe. Ensured accuracy and reliability in high-volume payment environments by coordinating with global providers and maintaining seamless service delivery.

Shoes Bank/ Goggles | Retail Sales Worker
